

TRANSFORMATIONS

A JOURNAL DETAILING THE STEPS TO IMPROVED HORSE HEALTH AND PERFORMANCE

*“My horse Cricket had rain rot. I tried **EPICOAT** and 7 days later it was gone! I’m so impressed!”*

– Arron Peluzzo

BEFORE

AFTER

Kricket 7 Day Transformation

Owner: Arron Peluzzo – Chipley, FL

Steps to Success

1. Feed 6 ml EPICOAT syringed by mouth every day.

Owner's Comments

My name is Arron Peluzzo, and this is my horse, Cricket. I have owned him for over 5 years. Cricket and I have done a little of everything, from trail riding and barrel racing to even jumping. He's my go to guy! When I first got Cricket, he had a beautiful shiny coat and no skin problems whatsoever. Last year we moved, and he got rain rot, we have battled it for the last year! Nothing worked, we tried topical treatments and supplements. It would always come right back! I was horrified to see my beautiful boy look the way he did. Then we tried Spectra's **EPICOAT**! I started him on it and waited seven days. The transformation was astounding! I couldn't believe the rain rot was GONE! His beautiful coat was back, in just seven days! And his coat just kept getting better, fourteen days later you couldn't even see where the rain rot had been. I am a believer in **EPICOAT**! Thanks to Spectra and **EPICOAT**, Cricket is back to his beautiful shiny self again!

EPICOAT[®] With GLO-MEGA[™] coat nutrition

COAT NUTRITIONAL SUPPORT

- Natural plant-based source of Omega-3 fatty acids
- Contains GLO-MEGA[®] coat nutrition
- Longer shelf life, resists oxidation
- Higher concentration of Omega-3's than other sources
- More Omega-3's per the amount of Omega-6's (anti-inflammatory)
- Concentrated formula - feed only 6 ml per day

Optimizing the Omega-3: Omega-6 Balance

Omega-3 fatty acids are anti-inflammatory while Omega-6 fatty acids are pro-inflammatory. Horses on fortified grain without access to grass may be getting more Omega-6 fatty acids than they need. As a result, most horses need additional Omega-3 fatty acids to balance the ratio.

EPICOAT has the highest concentration of Omega-3 fatty acids to Omega-6 fatty acids, thus making it easier to correct the imbalance. As a comparison, corn oil has 50 times more Omega-6 fatty acids than Omega-3 fatty acids. In fact, most oils have terrible Omega-fat ratios, therefore adding inflammation in your horse. With 3.5 times more Omega-3 than Omega-6, **EPICOAT** is the Gold Standard in Omega-3.

**“THE GOLD
STANDARD IN
OMEGA-3”**

EPICOAT is a concentrated, plant-based source of Omega-3 fatty acids for horses. It contains GLO-MEGA[®], a proprietary combination of vitamin E and chia oil, with peroxidation blockers to protect the product against rapid oxidation and rancidity.

6.5oz. = 32 day supply

16oz. = 80 day supply

*16oz. size comes with a pump

Omega-3 Content and Ratios

Source	Omega-3 Content	Omega-3:6 ratio
EPICOAT[®]	600 mg/g	3.5294
Camelina Oil	390 mg/g	2.17
Canola Oil	74.5 mg/g	0.4185
Corn Oil	10.4 mg/g	0.022
Soybean Oil	66.2 mg/g	0.1301
Grapeseed Oil	1 mg/g	0.0014
Coconut Oil	0.2 mg/g	0.0119
